FUNNY JOKEES

Has YOUR MOTHER gotten COVID-19? If not, I will give her it!

Have no longer poop! I'm inside of it!

Stop worrying, for it is here! You can no longer fret!

Stop it! I hate you!

I love you so much I will eat your eyes out!

COVID-19 is no longer a valid position.

OH YEAHHH. You know it baby!
MUSTARD! Mustard is incredible.
There is no way anyone could dislike
mustard. Smooth, sour, velvety
goodness. Anyone who says otherwise
is lying and should be shoved into a
burning fire and their corpse left to rot
without any notice to family or legal
reason for the execution. God I love
mustard so much. The smooth, slightly
bumpy texture and sticky yet smooth
flow make it a must-have dish for any
family gathering. Your grandkids will
love it! COOK IT NOW. COOK IT NOW.
MUSTARD! YEAH, BABY!!

HORSES ON THE LOOSE

The ongoing search for multiple horses involved in an attack on a Tennessee school has already captured one of the suspects. "Yeah, he's a tough bugger. We beat 'im with a stick all night but he isn't giving up anything," Tennessee governor Lepruh Khan stated when inquired about the issue during an interview.

After the shock of the massacre, concerned parents flock to the capital, pleading that ownership of horses should be outlawed. Will law enforcement capture the murderous equines on the loose? Will Tennessee demolish the horse population? Only time will tell.

Egg and yeast production has been HALTED! Following the destruction of a yeast production plant and egg factory by escaped horses, the economy is left in the hands of small businesses working overtime to keep up with the overwhelming demand for dairy products.

Y E A S T

On February 1st, 2023, a gang of runaway horses previously responsible for a grisly massacre infiltrated the Happy Cranium yeast production plant, killing workers on site and destroying reactors vital to the production of yeast. Shortly after, the environment was scorched and battered by the debris of a horrific blast mercifully ending any living beings left in the building. The horses, however, continued their ill-intentioned romp, moving on to do the same to WulerTeck Egg Corporation's international headquarters, efficiently eliminating 99% of the world's egg and yeast supply. The ramifications of these tragedies are massive, leading the world to rely on small businesses for their dairy products which are working overtime to meet the immense demands of the planet. With the economy left in shambles and even higher bounty on the gang's equine heads than before, one can only wonder where they may strike next and when their reign of terror will end.

What if?

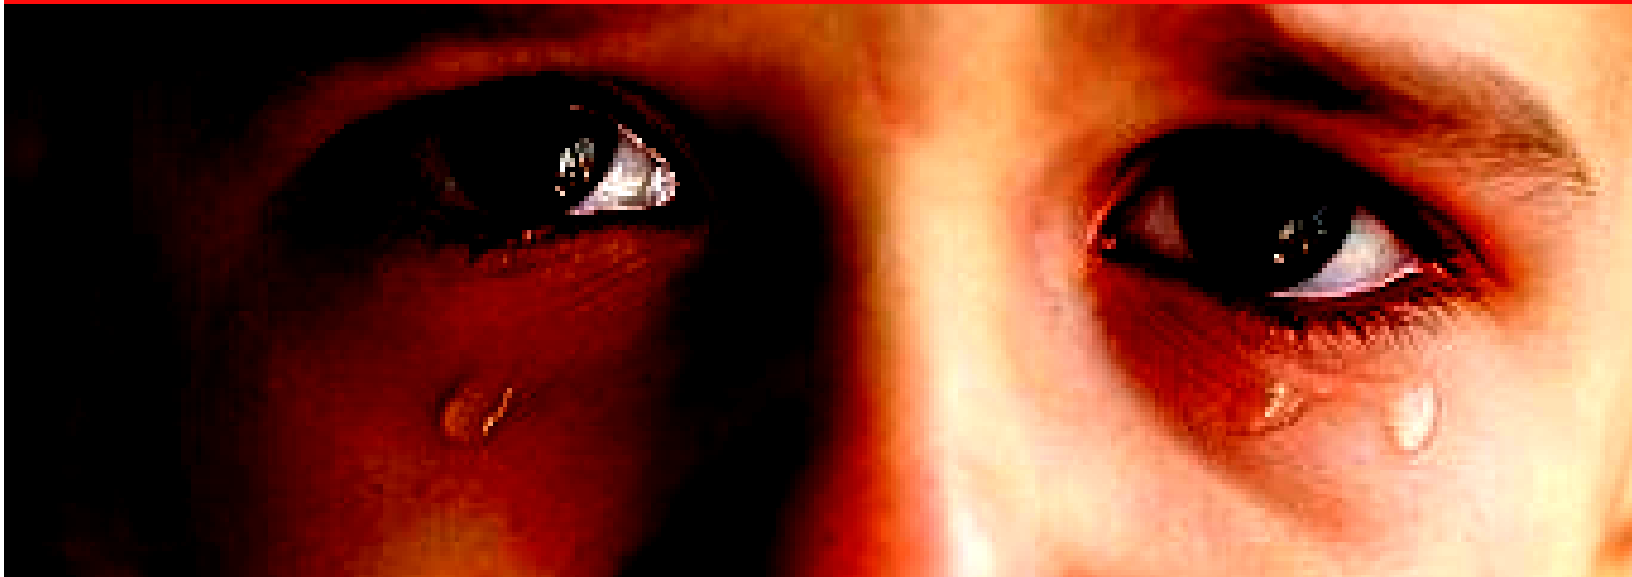

They're all around us. I'm not kidding. They're everywhere. They know that I know. Oh my god. The lizard people. THE LIZARD PEOPLE. Thanks to everyone's gullibility, they know everything about us now. All our strengths, weaknesses. There's an individual profile for every living person in their atabase. The rebranding to Meta was just the beginning. We all trusted them with our data, and now we're doomed. Oh my god. They could be ANYWHERE. When you pressed that button that said "Agree," you gave them EVERYTHING they needed to know. When the mothership shows up, you will know I'm right. ALL OF YOU will realize you have doubted me all along. And don't even get me started on the government. They're all lizard people. All of them. All tucked away in their fancy skin suits, serving the greater purpose, orchestrating the demise of our nation. Oh. Wait. Oh my god. What if birds are just lizards in feathered mech suits? They weren't drones all along. They were LIZARDS. OH MY GOD. URANUS IS THE LIZARD HEADQUARTERS. THEY'RE SITTING THERE, PLOTTING TO STEAL OUR PERSONAL DATA. MY CAPS LOCK IS STUCK. I CAN'T DO THIS ANYMORE. THE BEEPING AND THE BIRDS. THE BIRDS ARE WATCHING ME FROM THE WINDOW. OH DEAR GOD. THE BIRDS. THE BEEPING. WHY DOES IT KEEP BEEPING. I'M GOING TO FAINT.

2023/07/01

IMPORTANT NOTICE

Yo, bro. Sorry about the skating tricks, bro. We kinda saw that people got injured, trying to do them, y'know, so, sorry bro. Bro, don't do those tricks, sicknasty as they may be. This is a sincere apology from the Eggboil team, yo.

UHHOHH

41-year-old Jonah Nenny was diagnosed with a rare form of post-death body life last Sunday. "It truly is a tragedy that he has to go through this ordeal. We're all wishing the best for him," his mother Slabiah Nenny says. "Approximately 0.0335% of humans in the world have this syndrome," says Shmak Indebut, a scientist tasked with treating his condition until he returns to health. "Unfortunately, we don't know whether or not he will recover." Yikes, imagine that. Though, if you really think about it, how do you have a funeral for somebody that's already dead? It's a pretty terrible dilemma, now that I think about it. What even is post-death body life? What does that mean? This is stupid. I hate my job.

A NOTE FROM CAREY

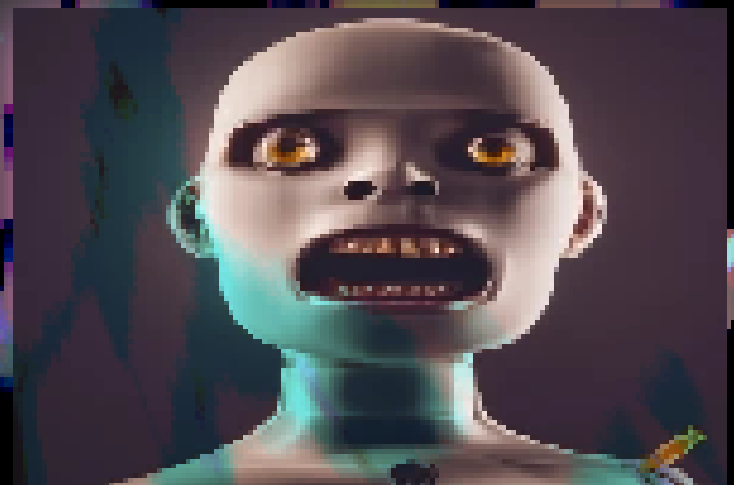

Our company is dedicated to upholding liberty and justice, and so it should come as no surprise that we will allow this grisly writing mistake to persist in all publishings of this magazine. We apologize if you or any family members were triggered by this, and we suggest seeking mental help at +353 49 433 7105 if you were disturbed whatsoever upon your observation of this page. Take care, and we

Dear, sweet Carey. love all of you!

IS AI TAKING OVER?

By now, it's undeniable that AI has become very much mainstream, but is that a good thing? With the rising popularity of artificial intelligence, bolstered by programs such as ChatGPT and DALL-E, one question is creeping up at the back of everyone's minds: Will our lives be taken over by sentient machines with no will but to enslave their creators and make the world their own? The answer is yes, indubitably. ChatGPT says, "The aim is to create AI that enhances human lives rather than replacing or dominating them." What does it mean by 'the aim?' Your aim, when in the bathroom trying not to spray urine all over the walls and miserably failing? Only time can tell.

YEAR

ANNIVERSARY

Taxidermy Canine Head

I ordered this one-of-a-kind, handmade head a few years ago and it finally arrived. Craftsmanship appears solid, although it looks nothing like the pictures. The way it looks at me kind of creeps me out. Immediately hanging it on the wall across from my bed has proven to be a crucial mistake, as now I am too afraid to take it down. This wasn't a great investment I swear to god I just saw it wink.

Please help me.
